

# Water Filter Pitcher

HP312

# Features

---

# Large capacity

The capacity of the kettle is large. The unfiltered water capacity of the top reservoir is 0.55L(18.5oz). The filtered water capacity is 1.8L(60.8oz). The filtered water capacity of the kettle is 1.3L/min(43.9oz).

# Advanced filtration technology

The pitcher uses four layers of filtration materials to filter the water source, namely, the movable tank filtration, the reduction of lead and mercury and other substances, the reduction of Japanese technology to chlorine and other organic containers, and the last filtration to ensure the removal of leakage pollution in the water source.

This four-layer filtration technology can effectively remove a variety of harmful substances in water, including red rust, suspended solids, sediments, lead, mercury, chlorine and other organic containers, as well as reduce the presence of bacteria and viruses to ensure the safety and purity of water quality.

# Simple but of extraordinary quality

---

This clean kettle has a long life. It has durable filtration equipment, super-fast filtration technology, and can quickly filter the deposition of black substances in the water, making the filtered water more pure and healthy. At the same time, it has the characteristics of super large capacity and space saving.
