

# LED Mood Light

HSL-2

# Features

---

# Full touch design

---

This light adopts a full touch design. Whether it is switching on and off, adjusting brightness or playing audio, it can be achieved with just a touch. The operation is very simple and convenient.

This light has a built-in speaker, which can play soft white noise and fan sound to help you relax. At the same time, the volume and type of sound can be adjusted by pressing the buttons, so that you can enjoy a more comfortable sleep experience. Moreover, the light has a variety of built-in scene modes, such as sleeping mode, reading mode, working mode, etc. Through simple button operation, you can easily switch to different lighting scenes.

# Power-off memory

---

This light also has a power-off memory function. When there is a power outage, the light will automatically save the current light brightness, mode and other settings, and automatically return to the previous state after the next power on. There is no need to manually adjust, which is convenient and practical.

This function can avoid the inconvenience and trouble caused by power outage, making it easier for you to enjoy a comfortable sleep experience.

# The perfect match between white noise and light

---

This LED mood light has 32 built-in white noises and natural sounds. With warm white lights and colorful ambient lights, it is easier for you to fall asleep. These white noises and natural sounds can cover up the noisy sounds around them, while creating a relaxing atmosphere and promoting relaxation and calming of the body and mind.

In addition, the design of warm white lighting is comfortable, which can relieve eye fatigue and relieve tension. Colorful ambient lights can adjust your mood through different colors to help you fall asleep faster.

In short, this light combines a variety of sounds and lighting effects to make your sleep easier and more comfortable.

# Scences to be used

---

This touch light is soft and not dazzling. It can be widely used to breastfeed the baby late at night or get up at night. It is also the first choice for sleeping with sleep. Colorful ambient lights can also be used for candlelight dinners or watching home theaters. So this small night light is also the best choice for gifts.
