

LED Mood Light

HSL-3

Features

A variety of natural environment audio

This light burns a variety of natural environment audio, including white noise scenes, nature scenes and baby sleeping scenes. Each scene has 6 audios, with a total of 18 sleep tracks.

These audio tracks can bring you a quiet and comfortable sleep experience. The audio of the white noise scene can cover up the noisy sounds around you and help you relax; the audio of the nature scene can simulate the sounds of nature, such as the sound of running water, the wind, the sound of birds, etc., so that you can feel the tranquility and comfort of nature; the audio of the baby sleeping scene can simulate the uterine environment and assist the baby to sleep.

Natural Serenity, Eco-friendly Sleep Aid

13 lighting effects

This light has 13 different lighting effects, including colored lights, warm light and warm breathing lights. It has 3-level brightness adjustment.

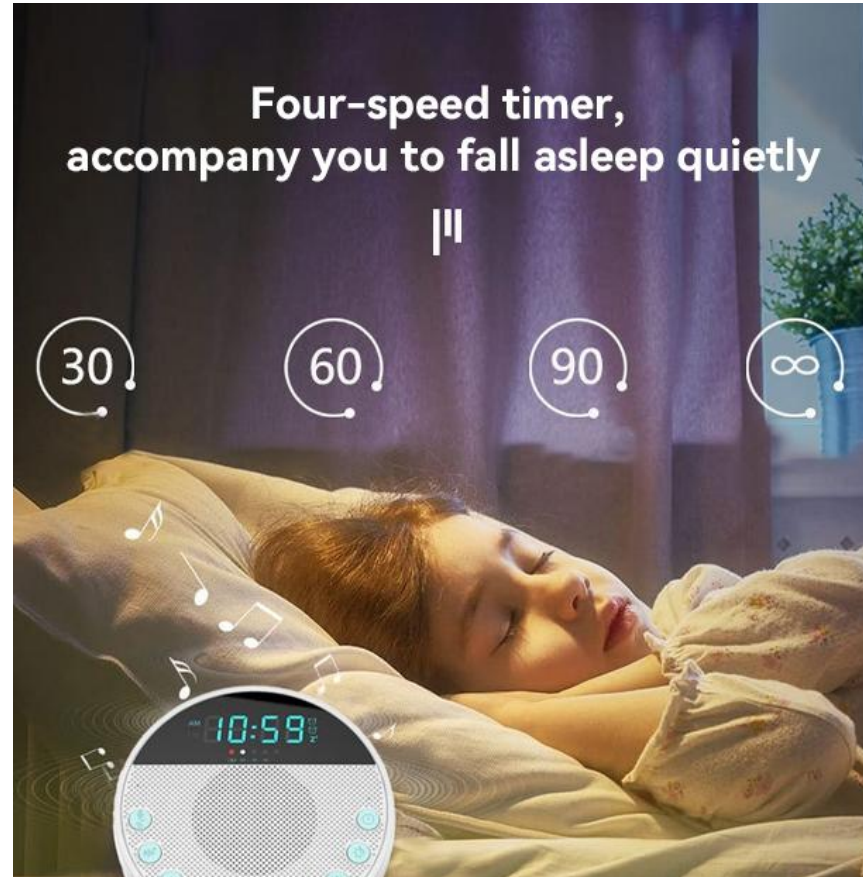

These different lighting effects can create different sleeping atmospheres to help you fall asleep better. The color light effect can adjust different colors to add some relaxed and pleasant atmosphere to your sleeping environment; the warm light effect can provide a warm feeling for the whole sleeping environment and help you relax.

In addition, these lighting effects can be combined with a variety of white noises and natural sounds, allowing you to enjoy a more perfect sleep experience in a quiet and comfortable environment.

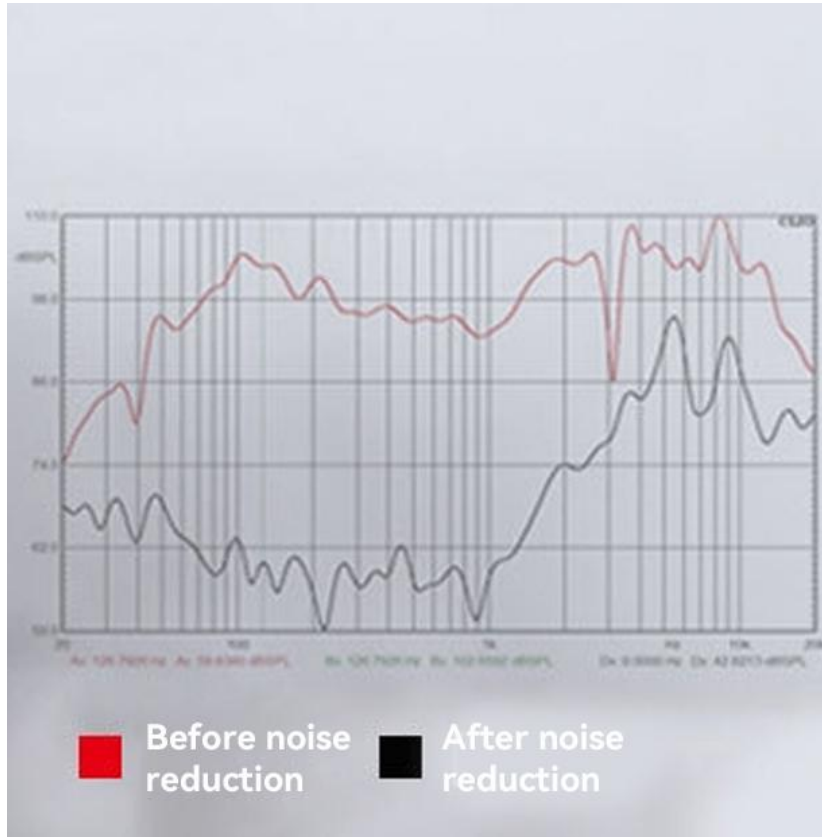

4 timing

It has four timing options: 30,60,90 and loop palyback. You can choose the timing method according to your favorite mode, and you don' t have to worry about wasting electricity if you can' t paly it all night.

Intelligent noise reduction

This product can make its own sound more crisp and pleasant through intelligent noise reduction. It has a 360° high-frequency all-inclusive true quality to make white noise in the best state, so that you can achieve a better sleep effect.

Snooze function

This light supports up to two alarm clocks at the same time. The snooze function of this sleeper is very practical. When the alarm clock goes off, just press the snooze button on the top of the sleeper to turn on the snooze mode. Sleep mode will turn off the alarm sound, so that you can sleep quietly for a while. This progressive way of getting up early allows you to gradually adapt to the light and sound before getting up, and avoid sudden strong stimulation that affects your sleep quality. At the same time, this gradual way of getting up early can also make you start the day more energetic.

Scenes to be used

Portable and essential for both home and travel

Improving Learning Efficiency

Calming a Fearful Pet

Helps with sleep

This light has a built-in 1200mAh lithium battery. It can run for about 8 hours when fully charged and comes with a Type-C charging cable to adapt to multi-environmental needs.

This light is small in size and easy to carry. It is a necessity for families and travel. This touch light is soft and not dazzling. It can be widely used to breastfeed the baby late at night or get up at night. It is also the first choice for sleeping with sleep. Colorful ambient lights can also be used for candlelight dinners or watching home theaters. So this small night light is also the best choice for gifts.
