

White Noise Sound Machine

HSM-2

Features

Shielding and attenuating "colored noise"

This machine can cover external noises, such as urban traffic, baby crying, animal chirping, etc., and make the sound of soothing music such as white noise more crisp and beautiful through intelligent noise reduction, so that it can be played in an ideal state, so as to create a deep sleep environment for you and make you sleep more at ease.

Assist the baby's sleep

This machine can simulate the sound of the uterine environment by playing white noise to help the baby fall asleep. These machines usually have a variety of different white noise modes and volume adjustment functions, which can be adjusted according to the different needs and preferences of babies.

30 sounds and 6 types

Through the design of high-quality sound sources and unique acoustic principles, this sleeper simulates a variety of natural sounds, such as the sound of running water, the sound of wind, the sound of birds, the sound of waves, etc., so that users can be immersed in the scene. These natural sounds can effectively help users relax, relieve tension and anxiety, and fall asleep better.

3 light effects

This machine has three light effects to choose from. When you touch the sleeper for the first time, a colorful flash will appear. Seven monochromes will flash out in sequence.

The second touch can choose your favorite monochrome.

The third touch is to turn on the breathing light, and the fourth touch turns off the light. You can adjust the lighting effect according to your preferences to make your sleep more comfortable.

Customizable colors in multiple options

Scences to be used

It built-in 1200mA large-capacity battery, the sleep machine has long battery life. It is more intelligent because it can be connected to mobile phones and other digital products with bluetooth. This product is small in size and light in weight, so that you can enjoy a comfortable sleep on business trips and travel.
