

Sleep Therapy Sound Machine

HSM-5

Features

6 sound types and 30 non-cyclic sleep sounds

The sleep therapy sound machine has 6 sound types, which allows you to choose different types of natural sounds or lullabies according to your needs and preferences. These modes include different sound types, sound combinations, sound intensity, etc., providing users with more flexible choices.

At the same time, it also has 30 kinds of high-fidelity soothing sounds, which can provide you with different auditory experiences to meet the needs of you. White noise, rain, running water, fan sound and other sounds can help you relax and reduce fatigue and anxiety. Sounds such as berceuse can help guide you into deep sleep and improve sleep quality.

Four timing methods with intelligent memory

The sleep therapy sound machine has four timing methods: 30 minutes, 60 minutes, 90 minutes and loop palyback. You can set the time according to their usual sleep time, and there is no need to worry about the power consumption caused by the machine running after falling asleep at night. In short, these four timing methods can be switched at will, allowing you to flexibly configure them according to actual needs to meet different usage scenarios and needs.

When the device is turned on, the last used audio and light will be remembered. Remember your usage habits to enhance your user experience.

Stereo with night light

Music and lighting are important factors affecting sleep quality. Through soothing music and soft night lights at night, this sleep machine can create a warm and comfortable environment, help you fall asleep faster and more easily, and improve sleep quality. This is a good choice for you who need to improve sleep quality or reduce stress and anxiety.

Safe and durable materials

This sleep machine has many certifications and is made of high-quality materials. It is a safe, environmentally friendly, durable and trustworthy product. It has obtained CE/FCC/ROHS certification and meets relevant safety and environmental standards.

In addition, this sleep machine is made of high-quality ABS material, which has high strength and durability, so this sleep machine is strong and durable.

Dual version power supply

For the battery-powered option, this sleep lamp can be powered by a built-in battery without an external power supply. This power supply can make it convenient for you to use without a power outlet, especially in travel or outdoor activities.

At the same time, this sleep lamp also supports TYPE-C charging options, which can be charged using the TYPE-C interface.

In addition, the body of this sleep lamp is light and easy to carry. Whether it is travel, yoga or meditation, it is convenient to carry and use.
