

Smart Wake-up Light

HSS-2

Features

One-button switch and timed off function

Users only need to tap to turn on and off the lights, The sensitivity is high, and they can be set to automatically turn off the lights for 5-60 minutes. Don't worry about the extra electricity costs that will be on all night.

Two modes of the wake-up light

There are two modes of the alarm clock wake-up light: white light mode and magic light mode.

In white light mode, users can choose the appropriate brightness level according to their personal preferences through the brightness adjustment function of 00 to 20.

In the magic light mode, this alarm clock wake-up light provides 7 kinds of magic lights and 7 kinds of RGB lights for users to choose from. Users can choose different color lights according to their preferences and moods.

At the same time, the light also supports automatic or manual gradient function, making the change of the light more natural and smooth.

Simulate sunrise and sunset

This light allows you to wake up with sunrise and fall asleep with sunset. You can set the alarm clock to turn on slowly within 10-60 minutes before the alarm clock rings. The volume of the ringtone will gradually increase. The brightness of the light can be set of 0-20, and the ringtone volume can be set to 0-16. The light intensity of the light gradually increases to the set level. The light color changes from late morning red, and the bright daylight helps you wake up naturally from sleep.

Simulate the sunset gradually sinking when you fall asleep, giving you a feeling of drowsiness.

24 music and FM radio stations

This smart wake-up light has 24 built-in natural music, which can help you relax and sleep better. You can also use 9 natural sounds such as birdsongs, running water and your favorite FM radio channels as alarm sounds.

Whether it is used for soothing white noise or soft light music, it can provide you with the best sleep aid effect. In addition to natural music, this light also has FM radio function. The light has the function of turning off the light regularly. You can set the sleeping light to turn off automatically after a certain period of time according to your sleep schedule.

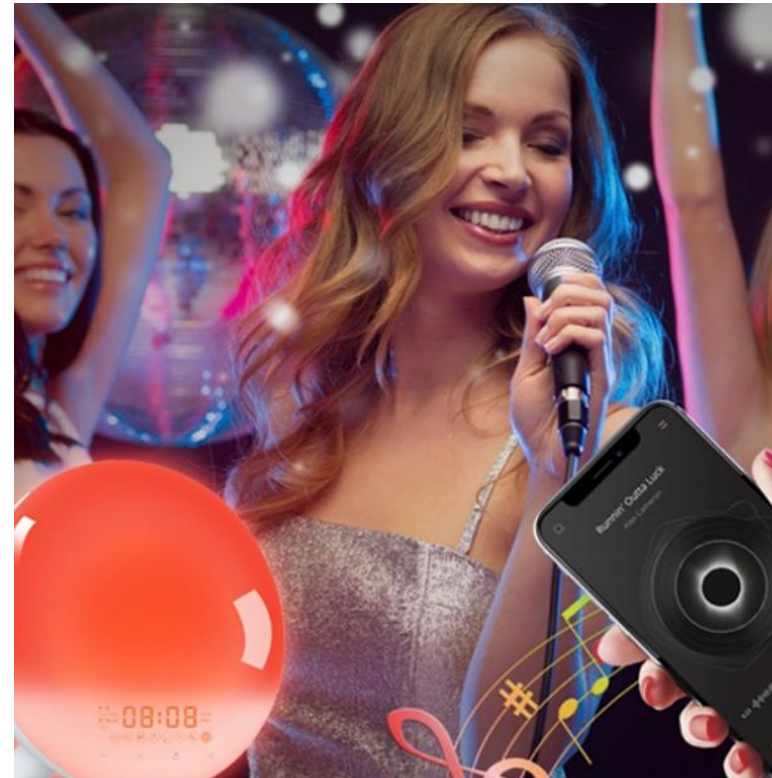

Snooze function

This light supports up to two alarm clocks at the same time. This light supports up to four alarm clocks at the same time. Press the snooze function to snooze. You can set an extra 1-20 minutes of sleep time in the app. It is repeated every 9 minutes, up to 5 times. You never have to worry about oversleeping.

Bluetooth stereo

This light comes with a Bluetooth stereo, which supports a variety of device connections, such as mobile phones, computers, players, etc. It usually takes only a few seconds to pair with the device, so that you can enjoy music or other audio content more quickly.

Scences to be used

This light can not only provide you with lighting and audio services, but also charge your mobile phone and other electronic devices.

This light can be used not only in the bedroom, but also in the living room, office and other occasions. It has a wide range of applicability and can meet the needs of different users in different environments.
